#### Section B.1

#### Introduction

#### **B.1.1** Overview and Purpose

California Government Code §65580-65589 states that the Housing Element must include an inventory of adequate sites that are zoned and available within the planning period to meet the jurisdiction's fair share of regional housing needs across all income levels. Together with the anticipated accessory dwelling units (ADUs) and entitled or in process development projects, the sites inventory helps to inform whether the jurisdiction has adequate developable land to meet its Regional Housing Needs Allocation (RHNA), given its current regulatory framework and market conditions. This Appendix details the sites inventory and supporting analysis methodology and assumptions.

#### **B.1.2** Regional Housing Needs Allocation

Every jurisdiction needs to identify sufficient land to accommodate housing for every economic segment of the community. To comply, a jurisdiction must demonstrate adequate capacity for development through appropriate development regulations and land use policies. Every jurisdiction is assigned a set number of housing units to accommodate through the Regional Housing Needs Allocation (RHNA), which projects the housing need for the whole region.

The Association of Bay Area Governments (ABAG), a regional planning agency, is responsible for distributing the RHNA to each jurisdiction within its nine-county Bay Area region, which includes unincorporated Alameda County. The RHNA is distributed by income category. For the 2023-2031 Housing Element update, unincorporated Alameda County has 4,711 units to accommodate.

Table B-1: 6th Cycle RHNA

| Very Low Income | Low Income | Moderate Income | Above Moderate Income | Total       |
|-----------------|------------|-----------------|-----------------------|-------------|
| 1,251 units     | 721 units  | 763 units       | 1,976 units           | 4,711 units |

During the January 31, 2023 to January 31, 2031 planning period, the County must ensure the availability of adequate residential sites to accommodate these 4,711 units. This Appendix provides an overview of the methodology used to evaluate the adequacy of sites within unincorporated Alameda County and identifies such sites for future residential development to fulfill the County's share of regional housing needs.

#### B.1.3 Data

The sites inventory analysis used data provided by the County, such as GIS data and building permit/entitlement information. The following is an overview of the data used:

- County-level parcel GIS data, including General Plan land use designation, zoning districts, ownership, ages of buildings, improvement values, land values, existing number of units, etc.
- Alameda County Assessors data
- Business licenses
- ADU building permits issued
- Entitled projects and projects in the entitlement phase
- Prior Housing Element site inventories
- Annual Progress Reports to HCD during the 5th Cycle
- Zoning Code, General Plan, and Specific Plan allowed density per acre and minimum lot sizes
- Satellite imagery from Google and other services

County staff also relied on several site visits and communication with individual residents and landowners.

## Section B.2 Future Residential Development Potential

#### **B.2.1** Accessory Dwelling Units

Since 2018, there have been significant changes to state laws that have eased the development standards and streamlined the approval process for Accessory Dwelling Units (ADUs). As a result, the number of ADU building permits issued, and overall production, has increased. Table B-2 shows the number of building permits issued for ADUs in unincorporated Alameda County from 2019 through 2023.

Table B-2: ADU Building Permits Issued (2018-2022)

| Year           | Permitted ADUs |
|----------------|----------------|
| 2019           | 21             |
| 2020           | 44             |
| 2021           | 47             |
| 2022           | 83             |
| 2023           | 114            |
| Total          | 309            |
| Annual Average | 61.8           |

There have been, on average, 61.8 ADU permits issued per year and 30.8 ADUs completed. The County anticipates maintaining the average of 61 ADUs per year over the planning period...

Formatted Table

As reported in the 2023 Annual Progress Report, 114 building permits have been issued for ADUs in 2023 in Alameda County. As of the end of May 2024, 39 ADU permits have been issued. This is 7.8 ADUs per month and, assuming this average is maintained, will result in approximately 93 ADUs permits issued in 2024.

Alameda County last updated the code of ordinances regarding ADUs in 2017; since then, California has passed a number of related laws. As state law has progressed, staff have ongoingly updated interim guidelines. Program 1.K will bring Alameda County into compliance with current state laws and help promote ADU construction in the unincorporated communities. In February 2024, staff brought a draft ADU ordinance to the Planning Commission. In June 2024 staff shared updated interim ADU guidelines. At the time of writing, the draft ordinance is anticipated to go the the Board of Supervisors on August 8, 2024, for adoption, implementing Program 1.K.<sup>2</sup>

ABAG analyzed ADU affordability throughout the Bay Area to enable local governments to accurately assign projected ADUs to income categories. The ADU affordability assumptions identified by ABAG for communities with affirmatively furthering fair housing concerns were applied to ADUs projected over the planning period in Table B-3.

Table B-3: Affordability per ABAG ADU Survey

| Income Level   | Percent | ADU Projections |
|----------------|---------|-----------------|
| Very Low       | 30%     | 129             |
| Low            | 30%     | 128             |
| Moderate       | 30%     | 128             |
| Above Moderate | 10%     | 42              |
| Total          |         | 427             |

Note: this is the projected number of ADUs from 2024 to 2031. Source: ABAG, County of Alameda

#### **B.2.2** Entitled and Proposed Developments

Since the RHNA projection period for the 2023-2031 Housing Element begins on June 30, 2022, housing developments that (1) were proposed or received entitlement after June 30, 2022; (2) were not issued a certificate of occupancy until July 1, 2022, or after; and (3) are anticipated to be completed before January 31, 2031, can be credited toward the RHNA. Table B-4 lists those projects that meet those criteria and can be credited toward the 6th Cycle RHNA. Over the

<sup>1:</sup> Madrone Terrace Housing & Community Center: 20 apartments are restricted to formerly homeless households with severe mental health needs as per the state's No Place Like Home (NPLH) restrictions. Eligibility is income-restricted, as are rents, in accordance with the Low Income Housing Tax Credit program and other funding regulatory agreements. All apartments are targeted at households at 60% AMI or less. Partially funded through AHSC.

<sup>&</sup>lt;sup>2</sup>: 16490 E 14th St: This development is anticipated to have 15 2- to 4- bedroom condominiums. In June 2024, staff reviewed 2-, 3-, and 4-bedroom housing available for rent in Alameda County. For 39 2-bedroom condos and apartments, monthly rental prices ranged from \$1,895 to \$2,995, averaging at \$2,460. Based on state HCD's affordability calculator for the 2023 Annual Progress Report, all of the 2-bedroom units are priced for Moderate Income households or Lower Income households. The average price of \$2,460 is also considered Moderate Income. For 26 3-bedroom apartments and condos, monthly rental prices ranged from \$2,375 to \$4,500, averaging at \$3,383. Based on state HCD's affordability calculator for the 2023 Annual Progress Report, 25 of the 3-bedroom units are priced for Moderate Income households or Lower Income households. The average price of \$3,383 is also considered Moderate Income. For 22 4-room units, monthly rental prices ranged from \$2,795 to \$6,500, averaging

Table B-4: Entitled and Proposed Projects

|         |        | Existing/    | Initial                  | Initial | Units by Income Level         |               |      |                  |
|---------|--------|--------------|--------------------------|---------|-------------------------------|---------------|------|------------------|
| Address | Status | Existing Use | Previous<br>Building Age | FAR     | Improvement-<br>to-land-value | Above<br>Mod. | Mod. | Low or V.<br>Low |

at \$4,397. Based on state HCD's affordability calculator for the 2023 Annual Progress Report, 16 of the 4-bedroom units are priced for Moderate Income households, as is the average rental price. Based on this analysis, staff will count this project as Moderate Income.

<sup>&</sup>lt;sup>3</sup>: Ruby Street Apartments (also known as Crescent Grove): The units in this project are permanently affordable. Fifteen of the units will be set aside for individuals and families experiencing homelessness that are earning no more than 20% of the area median income. An additional 15 units will be for veterans through the VASH voucher program and another 10 units will be for people with disabilities through the Mainstream voucher project. All other apartments will be for households with 60% AMI or less. Partially funded through LIHTC.

<sup>4: 21855</sup> Hathaway Ave: This development is anticipated to have 12 4- to 5-bedroom townhomes. In June 2024, staff reviewed 4-bedroom and 5-bedroom housing available for rent in Alameda County. Most units available were individual homes, not townhomes. For 22 4-room units, monthly rental prices ranged from \$2,795 to \$6,500, averaging at \$4,397. Based on state HCD's affordability calculator for the 2023 Annual Progress Report, 16 of the 4-bedroom units are priced for Moderate Income households, as is the average rental price. For 23 5-room units, monthly prices ranged from \$3,500 to \$7,500, averaging at \$4,886. Based on state HCD's affordability calculator for the 2023 Annual Progress Report, 14 of the 5-bedroom units are priced for Moderate Income households, as is the average rental price. Based on this analysis, staff will count this project as Moderate Income.

#### B.2.4B.2.3 Assumptions

#### **Density**

This section discusses existing densities in the unincorporated areas, a discussion of density assumptions made in the sites inventory, and information supporting those assumptions.

Table B-5 below describes densities throughout Urban Unincorporated Alameda County and is followed by a discussion of the zoning districts.

Table B-5: Density for Existing Zones that Allow Residential

| Building Type           | Appropriate Zones          | Minimum Building Site (square feet) Per Dwelling Unit | Maximum Net Density (Dwelling Units Per Acre) |
|-------------------------|----------------------------|---|---|
| Single-Family           | R-1                        | 5,000   | 8.7   |
| Subdivision             | R-1-B Combining            | 8,000 - 40,000  | 1.1-5   |
|                         | R-1                        | 5,000   | 8.7   |
|                         | R-1-B Combining            | 8,000 - 40,000  | 1.1-5   |
| Hillside<br>Development | R-1 - Hillside (CV GP)     | 5,000 - 40,000  | 4 - 8.7                                       |
| Development             | Fairview Specific Plan     | 5,000 - 1 acre  | 1 - 6.0                                       |

R-1 Single Family Residential is Unincorporated Alameda County's most common zoning type. R-1 has a maximum density of 8.7 dwelling units to the acre and has a minimum building site area (MBSA) of 5,000 sq. ft. R-1-HO stands for single family residential with a hillside overlay. These districts are common throughout the Castro Valley Hills. These districts have a maximum density that varies from 1.1 to 8.7 dwelling units per acre and the MBSA also varies from 5,000 sq. ft. to 1 acre.

R-S Suburban Residential District is common in the Cherryland Area. It has a density of 8.7 DU/Acre and a MBSA of 5,000 sq. ft. The RS District can be pared with many different combining districts including RS-D20, D15, D35 to name a few. These combining districts spell out the density. For example, RS-D15 allows one dwelling unit per every 1,500 sq. ft. and the RS-D35 allows one dwelling unit per every 3,500 sq. ft. The different types of RS-Districts allow for different housing types. RS, RS-D35, and RS-DV allow for small lot single family, there are several districts that allow two story town homes including RS-D35, DV, D3, D25, and R2.

R2 Two Family Residence District allows two homes per 5,000 sq. ft. with a density of 17.4 DU/acre. Certain types of zoning allow three story town homes including RS-D25, D3, D20, DV, R-2 and R-3. R-3 stands for Four Family Dwelling Districts which allows one dwelling unit per 2,000 sq. ft. and 21.8 DU/Acre.

In the multifamily residential medium family category there are multiple types of zoning districts that allow this type of construction, including RS-D20, DV, D15, D3, R-3, the Ashland

Cherryland Business District, and the Castro Valley Central Business District (CVCBD) in the sub areas of 4, 5, 6, 7, and 11. In the CVCBD multi-family housing is not allowed along the boulevard for sub areas 5, 6, and 7, and for sub area 7 it is allowed along the side streets.

Multi-family residential high density is allowed in R-4, and in CVCBD land use group E in sub areas 8 and 9. In sub area 9 this type of residential is only allowed on parcels west of Redwood Rd. Multi-family residential high density allows the density of 34.5 to 43.5 for R-4 properties and 40-60 for the land use group E parcels that are applicable. Much of this type of housing is located near the downtown portions of Castro Valley Blvd. The R-4 zoning district is rarer and is scattered through the unincorporated areas.

The following section describes density assumptions made in the sites inventory.

Table B-6: Medium and High Density developments since 2015 in Unincorporated Alameda County.

Table B-6 shows developments in Unincorporated Alameda County from the 5<sup>th</sup> Housing Element Cycle. It describes 10 moderate- to high- density developments in recent years. The projects profiled demonstrate the demand for a variety of densities in new developments in Unincorporated Alameda County. Five of the developments, located in Castro Valley, Cherryland, and San Lorenzo, have densities lower than 20 units per acre and are examples of Missing Middle housing. The recent higher density projects, located primarily in the Eden area, show how developers can successfully build projects of more than 20 units per acre with existing zoning and processes. Additionally, the Housing Element Overlay Combining District (described in Program 3.H: Housing Element Overlay Combining District and below in the final subsection of section 2.4 of this appendix) further enables future proposed developments on sites listed in the sites inventory to meet higher densities, whether or not the site is proposed for rezoning.

Four sites listed in Table B-6 were developed on vacant land; all other developments listed in the table were underutilized non-vacant land. Those uses include parking, commercial buildings, and different forms of lower-density residences. As described later in this appendix, many nonvacant sites proposed as parts of the sites inventory have similar existing uses.

Given the limited number of residential developments that have been recently constructed in the Unincorporated Area and the wide range of densities allowed by zoning in the various unincorporated communities, the County has determined that data from recent projects does not provide adequate information across the range of allowed densities to make assumptions regarding the likely capacity of future developments. To estimate the realistic capacity for future residential development on sites inventory properties, the County assumed that each property

<sup>&</sup>lt;sup>2</sup> Overall density: 19.66 units per acre for entire Specific Plan area; total Specific Plan area is 29.5 acres

will be developed at 70% of the maximum density allowed under existing or, in the case of parcels to be rezoned, proposed zoning regulations. The only exception to this assumption was properties that would only allow one residence, which were assumed to be developed at 100%. The assumption of 70% of full capacity accounts for additional zoning standards such as parking, open space, and setback requirements that may affect the number of units that can be accommodated on a parcel. The density assumption of 70% is further supported by the Housing Element Overlay (described in Program 3.H: Housing Element Overlay Combining District and below and below in the final subsection of section 2.4 of this appendix). The density percentages achieved in Tables B-6, B-7, and B-13 (further described below) range from 17% to 495%, with a median of 99.5%. This shows the density assumption of 70% to be conservative.

In addition to recent local development projects in unincorporated Alameda County, Table B-7 identifies other development projects in the greater Bay Area that justify the use of a 70 percent realistic capacity assumption. In fact, the table below shows that a 70 percent realistic capacity assumption may be a conservative assumption, given the high demand for housing throughout the Bay Area.

Table B-7: Recent Housing Projects in Greater Bay Area

| Project                      | City                   | Site Size<br>(acres) | Allowed Density<br>(max du/ac)  | Units | Achieved<br>Density<br>(du/ac) | Affordable<br>Units? | Percent<br>Achieved |

LWC, Alameda County Planning Department

Finally, Table B-13, discussed further in the Development Trends and Market Analysis section, describes recent projects in neighboring San Leandro and Hayward. Achieved densities range from 17% to 495% for these projects, with a median of 82%. This is larger than assumed 70% achieved density for sites in the inventory.

Even with the 70% assumptions for previous development, moving forward, the new Housing Element Overlay Combining District for parcels on the Inventory will ensure capacity to construct the net buildable density at 70% of zoning density designations. The Housing Element Overlay Combining District is described in in the final subsection of section 2.4 of this appendix as well as Program 3.H: Housing Element Overlay Combining District in the report main body. The Housing Element Overlay Combining District will benefit from the following:

- Reduce development regulations for setbacks, height, open space, landscaping, and parking requirements. This will allow a higher floor area ratio of residential development.
- Incentivize higher density development by creating a streamlined permitting process.
- Many project types will be considered for ministerial approval if they meet the County's Objective Standards. Only the largest of market-rate projects will require discretionary review.
- New Administrative Modification process will enable parcels in the Housing Element sites inventory to achieve their projected density by allowing further modification to specific development standards such as building height, setbacks, open space, landscaping and parking if these prove an impediment to allowable density.

By fast tracking housing development in these areas using the Housing Element Overlay Combining District (both affordable and market rate) the County anticipates an upward trend in overall community resources and will track progress throughout the 6<sup>th</sup> Cycle. As discussed in Program 3.H, the Housing Element Overlay Combining District will be proposed for adoption at the same time as the proposed sites inventory rezonings. This will maximize the overlay's impact over the course of the planning period.

Additionally, the sites inventory assumes that on sites that allow for commercial uses future development will only include residential development. This excludes development at Bay Fair BART, which only assumes 50% of the current parking lot will become housing, or sites where first floor commercial could occur in addition to the projected number of residences.

If, in the course of the planning period, nonvacant sites develop as mixed-use sites with less than the maximum number of housing units or do not develop at all, Planning staff will identify additional sites to rezone to ensure there is adequate capacity for the RHNA allocation in compliance with No Net Loss rules, as described in Program 1.A.

However, recent developments and local knowledge suggest it is unlikely for mixed-use developments to succeed. There is limited demand for new commercial spaces in unincorporated Alameda County as evidenced by the following:

 No recent projects have been proposed with 100 percent new non-residential development on a site that allows residential and non-residential uses, except for minor commercial remodels and additions. A review of building permits for commercial

1

buildings since January 2015 demonstrates that that there has been very little new commercial development in the unincorporated areas. Completed projects since then are limited to: a new church in Castro Valley, new headquarters for the Castro Valley Sanitation District (CVSan), a new 2-story medical building in Castro Valley, a tasting room at a brewery in East County, a residential to commercial conversion in East County, nonprofit offices in East County, and the installation of 10 pre-fabricated trailer offices, many of which were temporary. While there have been many permits issued and finaled for building modification and maintenance, this commercial permit analysis demonstrates the limited market demand and limited market ability to provide new commercial-only spaces, especially outside of the Urban Growth Boundary.

- The proposed development of Cherryland Place at 20095 Mission Boulevard on the border between Cherryland and Ashland is one example of the difficulty of developing mixed use buildings. The project included 10,500 square feet of commercial space, 35 townhomes, and 21 apartments. Tenants in the commercial space would have been subsidized, but developers struggled to find them. While the overall design of the development contributed to it becoming financially infeasible in the current economic climate, difficulty filling commercial space contributed to this.
- Ashland Place, located at the corner of East 14th and Kent Avenue in Ashland, includes 85 units and 2,000 square feet of retail. The project was completed in 2015. The commercial space has tenants subsidized through a food business incubator. Without the incubator minimizing costs, it is likely that the existing businesses could not afford tp rent the commercial spaces at Ashland Place.
- The development at 15960 E 14<sup>th</sup> Street was completed in 2003 and has 3 commercial spaces, totaling at about 5,000 square feet of commercial space. As informed by local knowledge and Google Streetview analysis, one retail space has been vacant since the opening of the building. A second commercial space has been consistently occupied by offices (initially a construction firm, currently a tax accountant). While valuable members of the county's business community, these kinds of businesses contribute little to the vitality of the street and have limited relationships with surrounding residents. The third is occupied by a corner shop chain that sells fresh food in addition to packaged goods.
- The residential construction of the St. Alphonsus townhome development (near 16290 Foothill Boulevard) was completed in 2020. During the development process, staff agreed to separating the required commercial component of the development from the residential component. No commercial construction has been successfully proposed for the remaining land set aside for commercial use. The existing vacant lot is now proposed for residential use.
- Like the St. Alphonsus development described above, when the townhomes on Cobblestone Lane and Cobblestone Loop in San Lorenzo were completed in 2009, the land on parcel 411-91-2 was set aside for supplementary commercial development. This land has been vacant for 15 years; no commercial construction has been successfully proposed for the remaining land set aside for commercial use. The existing vacant lot is now proposed for residential use.

- The development of Madrone Terrace, an affordable 79-unit housing development currently under construction with a neighboring park, began with the closure of 4 storefronts.
- Local knowledge gained via conversations with Alameda County department of Economic and Civic Development staff have made clear that there is limited demand for commercial spaces in the unincorporated areas, especially those outside Castro Valley; it would be difficult to find commercial tenants for new commercial spaces.
- Finally, staff conversations with local developers (detailed further in Appendix E) explain
  how existing commercial requirements make projects difficult to finance. The assumption
  that mixed use and commercial nonvacant sites will redevelop as 100% residential
  reflects the fact that there is little demand to build new commercial space.

#### B.2.5B.2.4 Methodology

To identify adequate sites for the sites inventory, the County used a detailed process to select and screen parcels for development during the 8-year planning period. Each phase of the process is described below. Note that while staff compared the 6<sup>th</sup> cycle sites inventory to sites identified during the 4<sup>th</sup> and 5<sup>th</sup> cycles, there was no specific step in the process where staff explicitly added vacant or underimproved sites from the previous cycles to the latest sites inventory list.

#### 1. Vacant Sites that Allow Residential

The County identified all vacant parcels that allow residential uses (see Table B-55). Staff initially identified vacant parcels as those with assessed land improvement values of zero and confirmed their vacancy with aerial imagery (primarily Google Maps) and firsthand local knowledge. Staff also used aerial imagery to locate additional vacant parcels not captured in the Assessors' data. At this time, parcels smaller than 2500 square feet were removed from the process since this is the minimum lot size in most communities in unincorporated Alameda County.

As noted in Table B-55, approximately two thirds of identified vacant residential parcels are currently zoned for single family residential use. Exactly three identified vacant sites are currently zoned as mixed use. All identified sites have access to infrastructure and utilities.

Parcels were removed from consideration at this stage if:

- The parcel had an existing residence or has an approved permit for one:
- The parcel has a 30% slope or more;
- A creek or road took up a significant amount of space making development infeasible;
- Or there was no access to a road.

#### 2. Nonvacant Sites that Allow Residential with Development Potential

The majority of residential land in unincorporated Alameda County is already developed, so nonvacant sites have also been included the sites inventory.

Staff began review of nonvacant sites by considering each parcel assessed with a land value greater than its improvement value. Parcels were removed from consideration at this stage if:

- There was local knowledge of a thriving business;
- Existing buildings were well maintained and/or built after 1993 (less than 30 years of age);
- The existing business's business license has been registered to the parcel's address for more than a decade;
- Or the present land use has a recent or approved permit for significant improvements.

The following current uses were also removed from consideration:

- Parcels with auto-oriented businesses located in the Auto Overlay, defined in the Ashland Cherryland Business District Specific Plan;
- Rights-of-way, railways, waterway, or utilities;
- Gas stations:
- Chain restaurants;
- And other publicly owned parcels with no near-term redevelopment potential.

Staff specifically looked for parcels occupied by closed businesses; with very large parking lots in comparison to business size; or adjacent to residential development.

Nonvacant sites were then added to the initial list based on building age, local knowledge, and interest from property owners.

The majority of nonvacant sites found are currently mixed use or commercial, but 12 parcels were identified with existing residential use. These parcels have been included in the sites inventory with the intent that additional housing would be added adjacent to existing residences and that no housing is lost through the process. They are listed in Table B-54.

#### 3. Initial Categorization and Possible Consolidation

At this stage, all parcels were categorized using existing zoning descriptions into income categories using the following densities.

Table B-8: Densities used in Unit Projections

| Density Allowed by Zone               | Income Level     |  |  |  |  |
|---------------------------------------|------------------|--|--|--|--|
| Generally < 20 dwelling units/acre    | Above Moderate   |  |  |  |  |
| Generally 20 – 29 dwelling units/acre | Moderate         |  |  |  |  |
| ≥ 30 dwelling units/acre              | Low and Very Low |  |  |  |  |
| Source: HCD, LWC                      |                  |  |  |  |  |

Per HCD guidance, sites accommodating lower-income housing are between 0.5 and 10 acres. All sites originally considered lower income, but whose lot size is smaller than 0.5 or larger than 10 acres, were categorized for moderate income housing.

Abutting sites with similar development potential were consolidated into groups. 31 different site groups are proposed through the sites inventory. 5 site groups are pipeline projects: G13 and G25 in Ashland; G16 and G30 in Castro Valley; and G31 in San Lorenzo. They are marked in

Table B-9. These projects demonstrate site consolidation is possible in Unincorporated Alameda County.

As described in Table B-9, 31 site groups have 1 owner each. The remaining 3 site groups are described below.

- Group G7 consists of 4 lots in Fairview. One 3.39 acre lot has frontage (426-160-91). The other three lots do not have any frontage. They are 426-170-16 (.36 acres), 426-170-14-2 (.38 acres), and 426-170-13 (1.08 acres). The three lots without frontage are also owned by different members of the same family. All parcels are large enough to construct new units under the existing zoning (minimum 6,000 square feet per unit); however, development of the sites without frontage is only possible through pairing with that with frontage (426-160-91). Rezoning and potential administrative modification via the Housing Element Overlay Combining District will further entice development on these sites.
- Group G15 consists of 3 lots in Fairview: one 1.38 acre vacant lot with frontage (416-180-1) and 3 additional lots that are .34-.35 acres in size without frontage (416-180-12; 416-180-14). All parcels are large enough to host new units at the current zoning (minimum 5,000 square feet per unit). However, development of the sites without frontage is only possible through pairing with that with frontage (416-180-1). Rezoning and potential administrative modification via the Housing Element Overlay Combining District will further entice development on these sites.

While having multiple owners can make site consolidation more difficult, table B-10 describes two recent projects with multiple parcels with different owners.

Note: groups G9, G10, G14, G19, G20, G24, G26, G27, and G33 were removed or relabeled. Labels G35, G36, G37, G38, G39, and G41, and G45 were omitted from use.

Two recent projects involving site consolidation in Unincorporated Alameda County are described in Table B-10. Both demonstrate that there is a track record with site consolidation in the unincorporated areas.-3544 Jamison Way involved the consolidation of 5 parcels of land, each separately held, for the construction of 27 units at a density of approximately 14.4. These example projects demonstrate that site consolidation involving multiple landowners is feasible in Unincorporated Alameda County. In addition, there are 5 projects currently under development that involve the consolidation of 2 or more parcels.

Table B-10: Examples of Site Consolidation in Recent Projects

## 4. Selecting Sites to Rezone

Previously identified sites were not adequate to accommodate the RHNA. Based on local knowledge and including stated development interest from certain landowners, the County prepared an initial list of potential rezone areas and parcels. Staff considered vacant and nonvacant land for rezoning. They included the following:

- Previously considered nonvacant parcels that were zoned General Commercial or a Castro Valley Business District Specific Plan designation not currently allowing residential uses
- In one case (parcel 413 001503302) a business owner's property was previously miszoned as Public; the owner has expressed a desire to close his business and transition the parcel to residential use, requiring rezoning.
- Larger sites previously considered for projects, such as Cherryland Place. By increasing
  the density of allowable residential use, the County will commit to making these sites
  more viable.
- Large parking lots
- Publicly held land, where agencies have notified the Alameda County Planning Department of their intent to sell it during the planning period.
- Vacant lots in Fairview and northern Castro Valley

Sites are proposed for zones that either match nearby residential uses, enable higher densities such that the lots can be used for lower income densities, or enable higher densities of above moderate income densities, in the caser of vacant lots in Fairview and Northern Castro Valley. Parcels proposed for rezoning were discussed at MAC meetings and on the Housing Element update website while the first and second Housing Element drafts were being written. Sites were discussed throughout the public comment period for the first and second drafts of the Housing Element and will be of significant focus during the public comment period for the 3<sup>rd</sup> Housing Element Draft. For more details on public engagement, see Appendix

Proposed rezones were further analyzed pursuant to the California Environmental Quality Act (CEQA).

Parcels proposed for rezone are listed in table B-<u>53</u>. Table B-11 describes the new zones <u>proposed densities</u>. Rezonings will both enable housing construction and maintain existing <u>uses' conformity to the zoning code</u>

Table B-11: Densities for rezonings

| Name                    | Density Range (dwelling unit per acre) | Planning Area                        |
|-------------------------|--|--------------------------------------|
| ACBD-CMU-R-43-HE-<br>AO | 22-43                                  | Ashland Cherryland Business District |

## 5. Addition of Substantial Sites for Mixed Income Use

Further reflection by staff on the sites inventory revealed a need for more above moderate units in order to meet RHNA. After confirming with HCD staff that higher density sites can have units assigned to multiple income categories, staff identified the following sites proposed for rezones to be explicitly for mixed income uses.

Table B-12: Mixed Income sites

| Site and Group  | APN         | Unit Density After                               | Address                                       | Acreage |
|---|-------------|--|---|---------|
| name  |             | Rezoning   |   |         |
| Crunch Fitness site                                     | 413-15-33-5 | ACBD-DC-86-HE:                                   | 177 Lewelling Blvd San Lorenzo<br>94580       | 3.17    |
| (G21)   | 413-15-34-3 | 43-86 units per acre                             | 85 Lewelling Blvd San Lorenzo<br>94580        | 1.05    |

Units at Mixed Income sites were apportioned in the following proportions: 35% Above Moderate Income units, 15% Moderate Income units, and 50% Low and Very Low Income units.

#### 6. Removal of sites from the sites inventory

After the submittal of the first Housing Element draft to state HCD, Alameda County staff needed to remove the following significant sites from the sites inventory. These changes resulted in additional rezonings, described throughout this appendix.

- The Castro Valley BART Parking Lot (APNs 84A-60-14-2, 84A-64-12-9, 84A-68-9-8, 84A-68-9-9, and 84A-72-8-5): BART's updated TOD Work Plan³ placed this site as developable in the long term (post-2034). County staff will work during this planning period to ensure the site's viability as a housing site in future Housing Element updates, as described in Program 1.O: Preparation of Castro Valley BART Station for future development
- Sheriff Radio Dispatch (APN 80A-153-12): In January 2024, the Alameda County General Services Agency (GSA) informed the Planning Department that the dispatch site would not be moving. Instead, the substation (parcel 80A-153-3-6) would be relocating. Planning staff will work closely with GSA to ensure the dispossession of the substation is timely, as described in Program 1.D: Facilitating Sheriff's Substation Development.

#### 7. The Housing Element Overlay Combining District

The Housing Element Overlay Combining District (HE Overlay, listed as Program 3.H) is a new overlay zone that will be created to meet Unincorporated Alameda County's housing needs in accordance with the County's Regional Housing Needs Allocation (RHNA) and serve as a tool to implement the housing recommendations of the 2023-2031 Housing Element Update. The Housing Element Overlay Combining District strategically covers the areas of the County that have been identified to achieve the housing demand; specifically, on properties listed in the sites inventory (excluding pipeline sites) to meet higher densities, whether the site is proposed for rezoning. New housing development that meets the criteria outlined in the Housing Element and are located in the HE Overlay will be allowed permit streamlining, ministerial review (as determined by staff), reduced parking requirements, administrative modifications, and CEQA exemptions to minimize constraints, expedite housing development, and achieve Unincorporated Alameda County's housing goals.

## **B.2.6B.2.5** Suitability of Nonvacant Sites

Residential land in unincorporated Alameda County is generally already built out, so the sites inventory includes nonvacant sites. After proposed rezonings, nonvacant sites comprise greater than 50% of combined Low- and Very Low-Income RHNA. Therefore, the County has conducted an analysis to ensure that existing uses on nonvacant sites are not impediments to residential redevelopment during the planning period (2023-2031).

<sup>&</sup>lt;sup>3</sup> You can review BART's TOD Work Plan and other news here: https://www.bart.gov/about/business/tod

Current uses for nonvacant sites are listed in table B-54, and those for sites proposed for rezone are included in table B-53. A representative selection of nonvacant and rezone sites are described in greater detail in section B.2.6 Profiles of Nonvacant and Rezone Sites.

### **Criteria for Nonvacant Sites**

The following criteria were used in selecting nonvacant sites. Properties that meet these criteria have the corresponding number listed in the 'Criteria Met' column:

- 1. An improvement-to-land value ratio of less than 1: A parcel's improvement-to-land value ratio can identify properties that are potentially underutilized. A value ratio of less than 1.0 indicates that the real estate market values the land itself more highly than what is currently built on that land. These underutilized parcels represent opportunities for property owners and developers to invest in more improvements that increase the overall value of the property and to densify housing.
- 2. <u>Expressed interest in development:</u> Developer or property owner interest in constructing housing on a particular site is a useful indicator that there is feasible development potential on a parcel.
- A structure listed as 30 years or older: The age of a structure identifies sites that may be likely to develop. Structures over 30 years of age may no longer suit the needs of the uses on the site or may need improvements due to deterioration. The sites inventory has been compared with the most recent Historical Register. There is no overlap (none of the nonvacant sites in Tables B-53 or B-54 are also historic properties).
- 3.4. The approximate floor area of the projected units is at least 3 times larger than the existing built area of current structures. Larger buildings are likely to be more profitable. Staff assumed that projected units would be 1,200 square feet in size, to reflect the multibedroom units needed by many residents and in part to account for the entryways, hallways, maintenance closets, mail areas and other common spaces that may be included in a multiunit development. Data for built areas of existing structures was from Alameda County Assessors data.

These criteria are used in tables B-<u>54</u> (nonvacant sites) and B-<u>53</u> (vacant and nonvacant sites proposed for rezoning). Sites in table B-<u>53</u> that are vacant are marked with a 'v.' <u>Table</u> <u>B-56 shares additional information regarding floor areas for all nonvacant sites (including those proposed for rezoning)</u>. Additional criteria are discussed in the remainder of this section.

County staff conducted analysis using assessors' data, specifically the age of existing structures on the properties and the ratio between built improvements and the value of the land, called the Improvement/Land or I/L ratio. Generally, any parcel with an I/L ratio less than 1 indicates an underutilization of land, while an I/L ratio of greater than 1 indicates the improvements on the land, like buildings, are more valuable than the land and are unlikely to be demolished to make way for a new housing project. An I/L ratio of less than 1 would suggest an investment opportunity ripe for new development with housing as the likely project.

1

Of the nonvacant sites not proposed for rezones, only 4\_sites in Table B-54\_have I/L ratios greater than 1. The following are descriptions of each site with I/L ratios above 1 (those marked with an asterisk after the address and without a '1' in the Criteria column):

- 84C-697-11-6, 84C-697-11-9: structures appear to be unoccupied and abandoned-looking residences. 'Improvements' in I/L refer to abandoned buildings in need of repair.
- 414-76-24, 414-81-3: 50% or more of the lot zoned for mixed use is paved, suggesting that it is underutilized and could be replaced with housing.

In addition, the following sites also refer to excess land on residential sites that can be developed into additional units through existing zoning and lot splitting: 84D-1173-24, 413-23-43-3, and 413-23-67-4.

The previous uses on many nonvacant sites in the Sites Inventory closely align with the previous land uses of properties recently developed in unincorporated Alameda County and nearby, similar jurisdictions as described in tables B-6, B-7, and B-13. This demonstrates a lower demand for these uses.

Shown in table B-6 are recent projects in unincorporated Alameda County. Madrone Terrace is a collaboration between an affordable developer and the local recreation district. It will include 79 units and a park. The previous land use included 4 single-story storefronts. The construction of Ashland Place involved removing a slip lane as well as several single-story residences and storefronts. Additionally, table B-13 describes housing construction at 2 former bowling alleys, a bank, a music conservatory, a gas station, a closed CVS, a furniture warehouse, and a labor union hall. Together, these various commercial uses are similar to the following sites in the Alameda County sites inventory:

| 80A-109-10 - small  | <del>414-76-49</del>  | 429-10-24 - Long-term   | 80-57-38-5 -                                     |

432-4-30-2 – existing

In table B-7, the housing development at 107 G Street in San Rafael replaced a restaurant. This is similar to sites 414-81-3 and 84C-724-91-2,-, which are bothis all occupied by small restaurants on comparatively large lots. Additionally, the owners of parcel 84C-724-91-2 reached out to staff for inclusion of the lot in the sites inventory.

429-10-61

Table B-13 describes recent projects in neighboring Hayward and San Leandro. Two projects in Hayward, Legacy at Hayward and Mission Crossings, were formerly for auto uses like car sales and repairs. This is similar to the following sites, all of which are auto sales businesses with minor improvements and underutilized lots: the parcels in group G19 (414-21-3, 414-21-4, 414-21-6-1, 414-21-85), 80B-300-11, 80-71-46, 80A-108-9, 80A-108-11-1, 84A-12-3, and 80A-109-

417-261-10

21-1. Additionally, these projects have similar original uses to 84A-12-2-2, an existing auto repair business on an underutilized lot. Further, recent comments at the April 16, 2024, Planning Commission and engagement regarding the Community Climate Action Plan (being written concurrent to the Housing Element update) support lowering the density of auto-serving businesses in the unincorporated communities.

Lincoln Landing (table B-13) in Hayward was previously offices; this is a similar use to site 414-76-24, a small office on an underutilized lot. Housing at Maple and Main (table B-13) was formerly a college; this is a similar land use to site 416-40-44, a now closed school that has received significant development interest.

Table B-7 describes two forthcoming projects in Fremont: the Gateway Plaza Apartments (9160 Paseo Padre Parkway) and the Fremont Hub (39150 Argonaut Way). Gateway Plaza will involve the demolition of seasonal commercial (former gym location) within a shopping plaza and the effective loss of 189 commercial parking spots. The Fremont Hub development will involve the demolition of retail-commercial – including a CVS, a Staples, and several smaller restaurants in a shopping plaza – and 426 parking. Together, the two projects will include over 500 new housing units as well as retail space and partial parking replacement. These two projects represent the growing demand for higher density housing near commercial hubs in Alameda County outside of major cities.

The following parcels In the sites Inventory represent similar development opportunities to the Gateway Plaza and Fremont Hub projects: 413-15-34-3 and 413-15-33-5, which represent an existing gym, retail, and extensive parking lot; 412-39-24-3, which is an existing vacant commercial building within a shopping plaza; 84A-60-4-3, which is a large grocery parking lot within a shopping plaza near a BART station; and 412-34-36, which is a large grocery parking lot within a shopping plaza.

The above discussion compares nonvacant sites in the sites inventory to recent housing developments with comparable previous uses, demonstrating the relatively lower market demand for those uses when compared to housing development. A representative selection of the 96 nonvacant parcels in the sites inventory is further discussed in section B 2.6 of this appendix.

The owners (or their representatives) of the following sites have been in active conversation with Planning staff to ensure their property is included in the Housing Element sites inventory and are committed to future development: 413-93-1-3, 426-140-9-2, 416-30-14-3, 416-180-20, 84C-1064-28, 84C-1064-26, and 84C-1064-27.

The parcels in G6 (413-23-43-3, 413-23-43-4, and 413-23-67-4), in G42 (84B-550-1-1, 84B-553-1-4, 84B-553-14-3, 84B-553-16, and 84B-553-1-6) and parcel 80A-188-2-7 are all owned by religious bodies. Alameda County staff are committed to ongoing outreach to these owners regarding housing development via Program 1.N: Allow Religious Institution-Affiliated Housing. The parcels in G43 (84C-1064-26, 84C-1064-27, and 84C-1064-28) and parcel 416-30-14-3 are examples of religious institution-affiliated sites with anticipated housing projects.

Formatted: Font: (Default) Arial

Finally, the following sites are unused paved lots (not parking lots), occupied by temporary storage structures, or being used as outdoor storage, which is generally not permitted in the unincorporated communities. These lots can be better utilized as residences in the unincorporated communities: 413-67-5-2, 412-14-34-2, 414-81-2, 414-81-3, 80C-479-1, 414-41-32, 412-31-92, and 432-20-9-2.

## **Development Trends and Market Analysis**

Non-vacant sites in the unincorporated area are a unique challenge that may not exist in incorporated cities. Many long-time residents view parcels occupied by tax-generating businesses as the necessary economic engine if incorporation as a new city were to occur. These commercial locations comprise about 32.2% of nonvacant sites listed (49 of 152 total nonvacant and rezone sites) and 15.4% of all sites (excluding existing projects, or pipeline sites). Commercially zoned properties located along major thoroughfares in the urban unincorporated communities are viewed by some residents as in finite supply and as something to be maintained if at all possible to protect the opportunity for incorporation, should the prospects of becoming a city improve.

In July 2023 the Local Agency Formation Commission (LAFCO) of Alameda County released a draft report analyzing the feasibility of incorporating Castro Valley, the Eden Area, and Fairview in different combinations. The report explains that, at current taxation rates with existing residential and business communities, no configuration of incorporation would have a fully balanced budget and reasonable annual reserves in funding without additional taxation. Nevertheless, possible incorporation was considered when looking at non-vacant sites, especially those with commercial uses. During the December 2023 Housing Element Draft midreview update, in response to resident feedback and upon updating the list of pipeline sites included in table B-4, staff were able to remove 25 nonvacant sites, 19 of which are commercial, from the Sites Inventory list. Of the 221 units removed through this process, 14 parcels, or 143 units (64.7%), were located in Ashland and all have commercial uses.

During subsequent reviews of the Sites Inventory for the second and third Housing Element drafts, staff removed an additional 16 commercial nonvacant sites located in Castro Valley, Ashland, and San Lorenzo.

About 53.9% of the nonvacant sites, or 82 sites including rezones, identified in the County's sites inventory are located in specific plan areas, area plans, or business districts. This requires the County to consider the viability of these sites to convert to housing. The County has a track record over the 5<sup>th</sup> Housing Element cycle of developing housing, particularly affordable housing, on nonvacant sites. Given programs to facilitate the development of housing in the Housing Element, however, staff anticipates a higher number of sites transitioning to partial or full residential use.

Tables B-6, B-7 and B-13 show recently entitled and constructed projects in Unincorporated Alameda County, the greater Bay Area region, and neighboring Hayward and San Leandro, respectively. Each table shows the percentage of density allowable by zoning achieved by the

project. Achieved densities range from 17% to 495%, with a median of 99.5%. This shows the density assumption in sites inventory unit projection of 70% to be conservative.

Table B-6 and B-10 also describe previous uses. Proposed nonvacant sites (listed in tables B-53 and B-54) have similar uses as those of the previous projects. Previous uses include: agricultural, auto sales and repairs, occupied and unoccupied residential, educational and community places, commercial uses, offices, and parking lots and paved lots. These uses are discussed in greater detail un the <u>preceding</u> section as well as B 2.6. There is a history of similar conversions to residential in the Central Alameda region and documented, decreasing interest in maintaining the previous uses of these sites.

Some identified nonvacant sites have existing residential units, but these are low intensity developed parcels where additional units could be added without demolishing the existing units or where existing residential units could be demolished for a project with a larger number of units. Identifying these parcels as potential housing sites does not mean existing units will be demolished (e.g., some parcels can accommodate additional units through lot splitting while retaining existing structures/units).

Despite the desire of some residents to maintain retail, analysis and the experiences of the Alameda County Office of Economic and Civic Development agree that, with the exception of parts of Castro Valley, there is an over-supply of retail and commercial spaces and very little demand.

With a low demand for retail, mixed use projects generally have to rely on the housing portion of the project to subsidize the ground floor retail. The experiences of developers who spoke with Planning Department staff agree with this sentiment, citing existing requirements for the construction of commercial ground floor uses as barriers to housing construction. Without demand for new retail and commercial spaces, it is onerous to successfully fill required commercial spaces. See Appendix E for further details on engagement.

The COVID-19 pandemic and access to retail shopping, the growing prevalence of online shopping, and COVID-related restrictions on store operations have accelerated the demise of certain retail businesses. This is especially true for local small businesses, which have fewer financial resources to adapt than larger national chains do. Due in part to this, many nonvacant commercial sites available in the County do not represent likely new projects.

Further, there is little expectation of office uses in the urban unincorporated area. The Eden Area and Castro Valley have not historically been strong office markets compared to other areas of Alameda County, like Oakland and Fremont.

One exception to the above market constraints is unincorporated Castro Valley, which is attracting food-centered businesses that are moving into renovated spaces and feeding off the success of the CV Marketplace. The focus on high quality food and unique dining experiences is likely to be successful in Castro Valley, and the nonvacant sites located there tend to be outside

the downtown core or at large catalyst sites such as the BART station and other large sites that seem ripe for redevelopment during the 6<sup>th</sup> Cycle. Staff see the sites in the Castro Valley business district as a more successful location for mixed use development because of the areas continued commercial success and agree that the active commercial district ultimately makes downtown Castro Valley an attractive place to live.

Figure B-1. The most recent Google imagery of 20102 Mission Boulevard (April 2022).

20102 Mission Boulevard (.52 acres) is currently occupied by a vacant former restaurant, Banchero's Italian Dinners. The building has been vacant since 2012, when the restaurant closed. Based on the business license history, one other restaurant attempted to open at this site between 2016 and 2018 but was not successful. While there is resident interest in having more diverse restaurant options in the unincorporated communities, the fact that this building has remained vacant for 12 years highlights that a different, noncommercial use will likely be more successful.

20102 Mission Boulevard is currently planned for commercial use but allows housing through the Eden Area housing overlay. Proposed changes to the general plan will allow only high density residential (between 43 and 86 units per acre). The property is in the Ashland Cherryland Business District and zoned District Mixed Use (DMU), which allows for a variety of residential and commercial uses. Proposed rezoning will allow for the same commercial uses allowed in DMU districts as well as higher density housing (43-86 units per acre). The 31 units described for this site assume that 70% of the entire lot will be occupied by housing.

The Improvement to Land ratio shows that, based on assessed value, the property Is underutilized. This site is located next to a future park, making it an ideal location for dense housing. Interim plans for the park include roller skating, pickleball, children's biking and obstacle courses, and a seating area<sup>4</sup>. Additionally, there is regional success in the development of restaurants into housing, as shown in table B-7 which describes a project in San Rafael where a much smaller parcel (.17 acres) with a former restaurant was developed into housing.

Figure B-2. The most recent Google imagery of 17144 and 17156 E 14<sup>TH</sup> (June 2023).

The parcels at 17144 and 17156 E 14<sup>TH</sup> St are owned by the same person. One parcel (080A010901000) is occupied by a one story commercial space. This building has had an active business license for a martial arts school since 2000. However, the business is listed as closed on Google, and the front sign has been covered since at least spring 2022, if not earlier. There has been a general lack of improvements to the site. The assessed worth of the building is slightly higher than the land's worth; however, as described in other sections of this appendix, there has not significant demand for commercial spaces in the unincorporated areas.

The adjacent parcel (080A010902101) has previously hosted a small car sales lot. The business has an active license, but the lot has been empty or fenced in since summer 2023. Because this parcel has minimal improvements, it has a low improvement-to-land ratio.

While a bigger site, the current Madrone Terrace project demonstrates the viability of redeveloping small commercial buildings into multi-unit housing.

|                                     |                                |                         |  |                         |  |  |  |

The Bay Fair BART Station is located on border between Ashland and the city of San Leandro. The south western parking lot (parcels 080D056502900, 080D056803100, 080D056803000, 080D056503000, and 080D056301700) is located in Ashland.

State law AB 2923 (2018) requires a number of zoning and development regulation changes for BART properties<sup>5</sup>, and MTC's Transit Oriented Communities policy requires additional zoning and development changes for the surrounding area. To comply with state law and regional policy and to make possible development standards match across both sides of the property, the site will be rezoned to a maximum of 400-125 units per acre

BART has confirmed that the Bay Fair Station is in the near-term timeline of their TOD Work Plan. Staff have been working with San Leandro staff and BART station planning staff to move development forward through applying for, and receiving, MTC Technical Assistance and a Community Based Transportation Planning grant to work on access to the station now and in the future. Staff are committed to completing necessary pre-development work for the site, including solving existing ADA accessibility. In addition, San Leandro has secured a PDA grant for their portion of the Bay Fair area; the county is a stakeholder in this process, which will include outreach to local residents in unincorporated.

As public land that will be developed very intentionality and next to BART, this site is an important place to create low and very low income housing and increase transit usage in the region and locally. Project unit numbers in Table B-16 only reflect development on the unincorporated side of the station and assume that 50% of the lot will be developed into housing. Staff anticipate that this will accommodate a potential additional BART rail line and any necessary parking replacement.

Figure B-3. Google imagery of the Bay Fair BART Station; the southwestern side is in the unincorporated areas (2024).

Figure B-4. The most recent Google imagery of 165 Lewelling Blvd (2024).

The 2.39 acre site at 165 Lewelling Blvd was incorrectly zoned and designated as public in previous updates. Since at least 2004, this parcel has been home to an industrial storage and parking lot. While it abuts the historic freight rail tracks that cross through Alameda County, this parcel is also located behind single family homes and across the rail tracks from a school. Planning staff have had multiple conversations with the site owners and their architect regarding future housing development, and owners are supportive of residential rezoning for future development. Additionally, the lot is significantly underutilized, based on the assessed value.

Figure B-5. The most recent Google imagery of 16151 E 14th Blvd (2024).

The parcel at 16151 E 14<sup>th</sup> St has a small commercial building and is located near a corner store and a mobile home neighborhood. Previous occupants have included an insurance office and an auto wholesaler. This building has not had an active business license associated with it since 2020, and the existing improvement on the parcel are valued as less than the land itself. This site is located across the street from the forthcoming Madrone Terrace development and associated park, and it is along one of the only bus lines in the unincorporated areas

Figure B-6. Recent Google Streetview of lots (2023).

The site consists of two properties owned by the same developer on the north side of Lewelling Boulevard in Ashland. The existing building is occupied by a Crunch Fitness and a restaurant store, and the remainder of the lots are paved for parking. The site is less than .5 miles from nearby grocery stores and adjacent to a local high school and other neighborhoods. Initial conversations with the property owners demonstrated interest in developing housing. Staff envision existing commercial uses continuing below additional floors of housing.

The four parcels in group G19 (414 002100300, 414 002108500, 414 002100400, and 414 002100601) are located on the southwestern side of the intersection of Mission Blvd. and Paradise Blvd. on Mission Blvd. All are owned by the same person. Together, they are 0.51

#### Alameda County Housing Element August 2024

acres. The parcels are currently occupied by 2 used car sales companies. According to business license history, 12 different car sale or repair businesses have filed business licenses for 19687 Mission Blvd or 19895 Mission Blvd since 1997, ranging in longevity from 2 months to 5 years.

These 4 parcels are located in the Ashland Cherryland Central Business District (ACBD) and are zoned Corridor Mixed Use—Commercial, which allows for residential as a secondary use. The general plan designation reflects this, with a commercial primary use and a housing everlay. The creation of the ACBD included the creation of the Auto Overlay (AO) "to cluster auto industry uses, such as auto sales, repair, and related industry uses, in the Cherryland Corridor to create 'critical mass' needed to attract customers to the area" as described in Program 1.8.2. of the ACBD on page 5-10. The Group 19 parcels are located outside of the AO.

Based on the existing allowed uses, a total of 15 units could be constructed on the group of lots. The 15 units described for this site assume that 70% of the 4 lots will be occupied by housing.

The property owner and/or tenants have maintained a fence, small office, and extended carport for car inventory. However, the Assessor's office valued improvements on the parcels at 0. This suggests that the land could be used for more intensive purposes.

This site is located near a property owned by a future park. Interim plans for the property include roller skating, pickleball, children's biking and obstacle courses, and a seating area<sup>6</sup>.

Sites Inventory and Methodology

County of Alameda | B-71

Formatted Table

The lots pictured above have the same owner. While one includes a used appliance business, both appear to include outdoor storage of appliances. In addition to not generally being a permitted use of land in the unincorporated areas, it seems unlikely that electronic appliances stored outside are re-sellable. The smaller lot was historically parking for the business but has been fenced off rom public use for multiple years. There is some concern about runoff from existing storage of appliances into the neighboring water channel. Both lots already allow for residential use, and as discussed elsewhere in this chapter, there are recent examples of small commercial buildings such as this being redeveloped into housing.

The parcel described in table B-21 is owned by the City of Hayward but located in Cherryland. It is one of many undeveloped parcels left from the would-be creation of Highway 238. Along with other vacant Oak Street parcels also part of the would-be route of the never constructed highway, Alameda County staff are eager to facilitate the parcel's development. Particularly as a publicly owned site, 21112 Oak Street has the development potential to be suitable for low income housing. Projected unit numbers assume only the half of the parcel furthest from the highway exit would be developed at the maximum density allowable (86 units per acre) and corresponding development standards. However, many jurisdictions throughout the Bay Area have significant housing development close to highway on-ramps. Examples include housing along Orlando Avenue in Hayward; the Durham Green Apartments in Fremont; housing along Cassatt Common in Fremont; the Lakeside Village apartment complex in San Leandro; and housing along Martin Boulevard and Leonard Drive in San Leandro.

The City of Hayward Is In the process of developing Its design and surplus process. The Information below regarding the disbursement of is provided on the city website:

"The City is currently working with consultant Design Workshop to develop a Route 238 Master Development Plan. This process will allow the City to facilitate the public input process, plan associated infrastructure upgrades, and conduct the environmental analysis needed. Upon completion of the Master Development Plan, the parcel groups will be offered for sale through a Request for Proposals (RFP) process to evaluate specific development plans submitted." <sup>7</sup>

The local Carpenter's Union Hall sits on a 2.8 acre lot, the majority of which is currently parking. Current general plan designations and zoning allow for residential uses as well. The sites inventory unit projections assume one acre of the lot could be developed at existing densities.

It\_is underutilized despite having a building and being fully paved. This site is adjacent to other sites proposed for residential re-use, such as the former Banchero's restaurant, as well as a parcel being developed into a park by the local recreation district. Being located near 2 major thoroughfares allows for excellent access, including by bus.

The <u>four-three</u> lots described in table B-<u>25-23</u> are owned by a single person who has expressed interest in redeveloping their land; to maximize future development potential, it was decided to rezone all four lots. The lots' uses include a flooring business, a <u>single family home</u>, an underutilized former car rental site, and a vacant lot. Even with existing improvements, all sites are considered underutilized based on assessed values. These units are located along one of the few bus corridors serving the unincorporated areas and are near a number of other parcels proposed for additional housing in this sites inventory.

Figure B-1310. Recent satellite imagery of lots and adjacent parcels (2024).

The 3 parcels described above are located in a residential area and owned by a religious entity, allowing for possible use of recent state laws favoring housing development by religious entities. The site has been host to a herd of goats for a number of years. Preceding that, the land was occupied by greenhouses. All 3 lots are underutilized, even including the existing 2 single family structures present. Projected unit counts listed in table B-24 assume the continued existence of these residences. While the goats will likely be missed by neighboring walkers-by, they do not pose an impediment to development. Development at the Group 6 parcels will be supported by ongoing outreach through Program 1.N.

owner of this <u>0</u>.65 acre site, who also owns the existing car sales and repair business on the lot, reached out to staff multiple times to request that his property be rezoned through the Housing Element process in order to move out of the auto sales industry. This site is on one of the few bus lines serving the unincorporated areas and is severely underutilized based on assessed values. At the rezoned density of up to 86 units per acre, the lot could host as many as 39 units of housing.

Group G18 consists of four parcels totaling two acres: 19521 Center St. (.94 acre), 19527 Center St. (.61 acres), one Center St. parcel without an address (.35 acre), and 19539 Center St. (.11 acre). The property is zoned R1-CSU-RV. The 12 units described for this site assume that 70% of the site, as a combined whole, will be occupied by housing.

The Planning Department received an application for a 10-lot subdivision for this group of parcels in 2019. Although the applicant ultimately abandoned the project, previous staff review of the site indicates that it has high potential for future development of housing.

Sites Inventory and Methodology

County of Alameda | B-85

The existing structures on the 4 properties reflected in the 'improvements' assessed buy the Assessors Office are in fact unoccupied, abandoned residences. In 2023, the Planning Department agreed that there was no historical significance to impede the existing structures' demolition. With this in mind, the Improvement to Land ratio shows that, based on assessed value, the property is underutilized. The site is located in an established residential neighborhood within walking distance of a middle school, small shopping center, a community park, a large regional park, and a small commercial corridor, making it an ideal location for additional housing.

Group G42 consists of five parcels totaling just under three acres: 19628 Lake Chabot Rd. (.12 acre), 19672 Lake Chabot Rd. (.14 acre), 2374 Somerset Ave. (.60 acre), 19634 Lake Chabot Rd. (.75 acre), 2964 Somerset Ave. (1.37 acres). These parcels are owned Foothill Baptist Church, which occupies a neighboring church site. The parcels under consideration as Group G42 are largely vacant or used for overflow parking, with several small buildings. Current zoning is R1-CSU-RV, allowing for 25.9 units. Rezoning to R-60-HE will allow for 40-60 units per acre. Assuming development occurs on 70% of the site as a combined whole, and assuming the church's existing buildings remain, this rezoned site will accommodate 61 units of dense housing.

The Improvement to Land ratio shows that, based on assessed value, a large portion of the property is underutilized. Church-owned sites represent ideal locations for affordable housing; Senate Bill 4, signed into law in 2023, aims to encourage affordable housing development on land owned by faith groups. Through Program 1.N: Allow Religious Institution-Affiliated Housing, Alameda County will continue to reach out to religiously-affiliated land owners. Locally, for example, proposed rezoning of land owned by Hayward First Presbyterian Church in Castro Valley would allow for 260 housing units. The site is located in an established residential neighborhood along bus transit lines and within walking distance of an elementary school, a local park, Eden Medical Center, and Castro Valley's commercial corridor, making it an ideal location for dense housing.

Sites Inventory and Methodology

0 Plaza Dr (2.05 acres), a County-owned parcel, is currently occupied by the Eden Township Substation of the Alameda County Sheriff's Office (ACSO). ACSO plans to vacate this property; consistent with Program 1.D and in compliance with the Surplus Land Act (codified at Government Code Section 54220 et seq.), the County will dispose of this property in 2026. Rezoning from Public Facilities to HDR-100-HE, will accommodate the development of 143 units of dense housing at the site. There are no known impediments to the development of housing at this location.

Figure B-15. The most recent Google imagery of 2610 Norbridge Ave.

2610 Norbridge Avenue (2.63 acres) is currently occupied by AT&T as a vehicle storage and dispatch lot. Development on the site consists of parking lean-tos and several outbuildings surrounded by a chain link fence. The parcel is currently zoned Sub Area 2 in the Castro Valley Central Business District Specific Plan, supporting Regional Retail and Entertainment. Rezoning to CVBD-S02-60-HE will allow up to 60 units/acre, accommodating development of 110 units of mixed-density housing.

2610 Norbridge Avenue is located along Castro Valley's main commercial corridor within walking distance of multiple grocery stores, service providers, and public transportation options, including Castro Valley BART. Proximity to these amenities in the heart of Castro Valley makes this an ideal site for mixed-density housing.

Figure B-16. The most recent Google imagery of 3443 Castro Valley Blvd

3443 Castro Valley Blvd (2.1 acres) is currently occupied by Lucky's grocery store and a large, underutilized parking lot. The site is currently zoned Castro Valley Central Business District Specific Plan Sub Area 7. Rezoning to CVBD-S07-86-HE will allow up to 86 units per acre. Assuming development of 70% of the parking lot area, this site will accommodate 126 units of mixed-density housing in addition to the grocery store. The Housing Element Overlay Combining District's Administrative Modification process will ensure that design standards will enable both uses.

The Improvement to Land ratio shows that, based on assessed value, the property is underutilized. Centrally located in Castro Valley's downtown district, within walking distance of BART, this is an ideal site for a mixed-use commercial residential development that supports both transit-oriented housing and local businesses.

The Improvement to Land ratio shows that, based on assessed value, the property is underutilized. Figure B-17. The most recent Google imagery of 2625 Castro Valley Blvd.

2625 Castro Valley Blvd (1.69 acres) is occupied by an auto repair business with a business license status of 'assessed/delinquent'. The auto repair use occupies the street-facing portion of the property, and the majority of the parcel is utilized as a storge yard. The site is currently zoned Castro Valley Central Business District Specific Plan Sub Area 2, with a land use designation that allows for Regional Retail and Entertainment. Rezoning to CVBD-S02-60-HE will allow for a density of up to 86 acres per acre, accommodating 70 units of mixed-density housing assuming development of 70% of the site.

The Improvement to Land ratio shows that, based on assessed value, the property is underutilized. Centrally located along Castro Valley's main commercial corridor within walking distance of grocery stores, services, and public transportation, this an ideal site for mixed-density housing.

Figure B-23. The most recent Google imagery of 2495 Castro Valley Blvd.

The Improvement to Land ratio shows that, based on assessed value, the property is underutilized. The site's owners have expressed interest in developing and submitted a preliminary review request to redevelop the lot as a drive-through restaurant in 2020. A moratorium against additional drive-through restaurants makes development of housing on the site more attractive and more likely. Centrally located along Castro Valley's main commercial corridor within walking distance of grocery stores, services, and public transportation, this an ideal site for mixed-density housing.

Figures B-24-18A and 18B (above and at right). The most recent Google imagery of 16290 Foothill Blvd.

16290 Foothill Boulevard (.71 acre) is a vacant site in Castro Valley's Fairmont Terrace neighborhood, owned by a religious organization. The site has been under consideration for commercial development in the past, but no current development projects are underway on the parcel.

The site is currently zoned Planned Development, with a general plan designation allowing for Neighborhood Commercial and Low Density Residential uses. Rezoning to CN-60-HE will allow for 60 units per acre, accommodating construction of 29 units of dense housing assuming development of 70% of the site.

Figure B-2619. The most recent Google imagery of 2652 Vergil Ct.

2652 Vergil Court (5.4 acres) is a vacant former school campus listed as surplus property by its owner, the Hayward Unified School District8. The site is zoned SCV-CSU-RV, which allows for properties no longer be needed for educational purposes to be developed as residential uses pursuant to approval of a Planned Development District. The 32-57 townhomelew-density units described for this site assumes that 70% of the site will be occupied by housing.

21320 Oak Street (.34 acre) is a vacant parcel owned by the City of Hayward. The City of Hayward is leading the planning and disposition for development of this and other surplus "California State Route 238 Corridor Lands" pursuant to a Purchase and Sale Agreement with the California Department of Transportation (Caltrans). This parcel will be offered for sale through a Request for Proposals (RFP) process to evaluate specific development plans submitted. City of Hayward is collaborating with Alameda County in the development of conceptual proposals.9 The parcel is currently zoned R4 - Multiple Residential. Rezoning to R-60-HE will allow for 40-60 units per acre, accommodating 10 units of housing assuming development of 70% of the site.

The City of Hayward is in the process of developing its design and surplus process. The information below regarding the disbursement of is provided on the city website:

"The City is currently working with consultant Design Workshop to develop a Route 238 Master Development Plan. This process will allow the City to facilitate the public input process, plan associated infrastructure upgrades, and conduct the environmental analysis needed. Upon completion of the Master Development Plan, the parcel groups will be offered for sale through a Request for Proposals (RFP) process to evaluate specific development plans submitted." 10

Figure B-2821. The most recent Google imagery of 3692 Castro Valley Blvd

3692 Castro Valley Blvd. (.32 units) is owned by a realty group and has been occupied by Rudy's Donut House for several decades. The owners of the existing business are seeking to retire and the site's owners have expressed interest to Planning staff in redevelopment. The site is currently zoned Castro Valley Central

B-108 | County of Alameda

Sites Inventory and Methodology

Formatted Table

Business District Specific Plan Sub Area 10. Rezoning to CVBD-S10-6086-HE will allow for 40-60-86 units per acre, accommodating 127 units of housing assuming development of 70% of the site.

The Improvement to Land ratio shows that, based on assessed value, the property is underutilized. 3692 Castro Valley Blvd is located along Castro Valley's main commercial corridor within walking distance of grocery stores, service providers, Castro Valley Library, and public transportation options, including Castro Valley BART. Proximity to these amenities in the heart of Castro Valley makes this an ideal site for transit-oriented housing.

Figure B-2922. The most recent Google imagery of 2659 Castro Valley Blvd

2659 Castro Valley Blvd. (.30 acre) is occupied by a used car sales business. The site is currently zoned Castro Valley Central Business District Specific Plan Sub Area 2. Rezoning to CBD-CD3-6986-HE will allow up to 8669 units per acre, accommodating 182 units of housing assuming development of 70% of the site.

B-110 | County of Alameda

Sites Inventory and Methodology

Formatted Table

The Improvement to Land ratio shows that, based on assessed value, the property is underutilized. In the past decade, 2659 Castro Valley Blvd has been in use as a day spa, a cash-for-gold business, a rental car lot, and a construction company. While there is resident interest in having more diverse business options in the unincorporated communities, the site's high turnover rate highlights that a noncommercial use will likely be more successful. 2659 Castro Valley Blvd is located along Castro Valley's main commercial corridor within walking distance of multiple grocery stores, service providers, and public transportation options. Proximity to these amenities in the heart of Castro Valley makes this an ideal site for transit-oriented housing.

Figures B-23A and 23B. Recent satellite imagery of lots and adjacent parcels (2024).

Figures B-23A and 23B. Recent satellite imagery of lots and adjacent parcels (2024). Figures B-23A and 23B. Recent satellite imagery of lots and adjacent parcels (2024).

The four parcels (412 001403902, 412 003400206, 412 001403802, 412 001403703) are currently used for parking and storage by United Rentals. United Rentals has operated on the subject parcel and adjacent parcels since 2015 as a legal nonconforming use. Lewis Rentals, the previous business, operated on the subject site prior to 1975. Prior the rental business, the subject site and adjacent parcels were used as a boat and recreational vehicle storage lot. The proposed amendment to the San Lorenzo Specific Plan will allow for the same commercial uses permitted in the C2 (general commercial) district, as well as higher density housing (43-86 units per acre). The 70 units described for these sites assume that 70% of the entire lot will be occupied by housing. Currently, there are trucks and equipment ready for rental parked on site. Most of the property is vacant except for two shop buildings located towards the rear of the lot.

15776 Hesperian Blvd is currently zoned for commercial use, but proposed changes to the Specific Plan will allow for both commercial and high-density residential use (between 43 and 86 units per acre). The Specific Plan includes a maximum set for the number of units in the area (580). The rezoning of the Specific Plan would incentivize construction of housing in the area. This site is located near a new development project, indicating interest in development in the area: the pipeline development known as Village Green Mixed Use Multifamily Housing (described in Table B-6).

Formatted Table

Figure B-24. Recent satellite imagery of parcel (2024).

The vacant parcel is situated at the corner of Paseo Grande and Hesperian Blvd. It was previously developed with a commercial building and approved for demolition in 2012. Since its demolition, the site has remained vacant, with little interest for commercial development, rendering it underutilized and devoid of any significant economic activity. The existing Zoning District, per the San Lorenzo Village Center Specific Plan, allows residential uses distributed within subareas of the Specific Plan area, as follows: "450 for Subareas 2, 4 and 5A through 5D, 130 for Subarea 6, total not to exceed 580 for entire Plan Area". This parcel is located in Subarea 5A. However, this Housing Element includes programs to remove this artificially low housing maximum that has never been met. The Housing Element Overlay would allow for up to 66 units. Among these, 23 units would fall under the above-moderate category, 9 units would be moderate, and 34 units would be categorized as low and very low moderate. The property owner and/or tenants have maintained a fence around the perimeter of the parcel. However, the Assessor's office valued improvements on the parcels at 0, suggesting potential for more intensive development. The 66 units proposed reflect the development of the parcel, excluding a portion dedicated to the future development of a fire station. This site is immediately adjacent to the pipeline development known as Village Green Mixed Use Multifamily Housing, which includes the development of a vacant land to 138 rental housing units and 11,049 square feet for indoor retail. (described in Table B-6).

### Figure B-25. Recent satellite imagery of parcel (2024).

The property consists of various amenities, including a grocery market, restaurant, U.S. Postal Office, general services, and retail stores. The expansive parking lot spans approximately 76,000 square feet, capable of accommodating up to 105 units of housing in addition to the grocery store. The Housing Element Overlay Combining District's Administrative Modification process will ensure that design standards will enable both uses. A glance at the Google Street view screenshot reveals that the parking lot is currently underutilized, presenting an opportunity for potential residential or additional commercial development.

The property consists of various amenities, including a grocery market, restaurant, U.S. Postal Office, general services, and retail stores. The expansive parking lot spans approximately 76,000 square feet, capable of accommodating up to 105 units of housing in addition to the grocery store. The Housing Element Overlay Combining District's Administrative Modification process will ensure that design standards will enable both uses. A glance at the Google Street view screenshot reveals that the parking lot is currently underutilized, presenting an opportunity for potential residential or additional commercial development.

Adjacent to the subject site lies a senior affordable housing project comprising 77 units. The entitlement process for this project was successfully completed in 2014, with Building Permits obtained for the completion of construction in 2017. This neighboring development adds additional residential housing for the senior community.

Formatted Table

The site has remained generally vacant for the past 10 years, with the exception for a previous retail unit that closed in 2017. There is a high turnaround for the retail spaces with minimal inquiries for retail uses of the site. A portion of the existing building served as a hub for a food drive, although it no longer operates from there. It's evident that retail is not a viable option for this specific location. Access to Kennedy Park is conveniently located not too far from the site, along with bus services along Hesperian. Additionally, it is near a 77-unit senior affordable housing development approved in 2015. Development of the site for residential uses would eliminate the constant vacant commercial tenant space. With the frontage on Hesperian Blvd, the option for vertical mixed-use with ground floor retail and residential above would maintain the developer and community interest in commercial development within this town center area while adding valuable housing stock to enliven the area.

Figure B-27. Recent satellite imagery of parcel (2024).

The site is currently underimproved. If developed, the site will serve as a residential gateway, marking the beginning of Hesperian into San Lorenzo village. Its current use is designated for staging of construction materials only. The development of the site will improve the unsightly nature of a vacant lot with the occasional

Formatted Table

Formatted: Tab stops: Not at 1.87"

construction machines and materials storage. There are single-family dwelling uses adjacent to the site. Transitioning from its current use as a staging site to the development of housing would enhance the aesthetics of the property.

Given the underutilization of the commercial land use for the past four decades, and its proximity to residential uses to the south and west, the property would best be used for residential purposes as reflected in the current general plan land use designation.

The site has undergone foreclosure proceedings. It features a single-family dwelling with a detached garage and spacious rear and side yards. Presently, the parcel is vacant with no known tenants occupying the building. Across the street on Via Enrico and San Lorenzo Ave, there are duplexes and triplexes. The site adjacent to the south is multi-family residential. To the west is a single-family neighborhood. Under current conditions, the area is not projected to have long-term sustainable commercial development given the number of commercial vacancies. Increasing the housing stock would increase the viability of the other commercial spaces on adjacent parcels. A projection of 36 units is anticipated for 70% of the property designated for residential purposes.

Figure B-28B. Recent street imagery of parcel (2024).

The existing commercial building on the relatively flat site is currently vacant, with no development applications received for the lot within the past decade. However, in 2010, the County issued a temporary use permit for a tree sales lot during the winter season. Unfortunately, based on Code Enforcement case history, the subject lot is increasingly subject to issues such as the overgrowth of vegetation, accumulation of trash, and storage of inoperable vehicles.

The existing commercial building on the relatively flat site is currently vacant, with no development applications received for the lot within the past decade. However, in 2010, the County issued a temporary use permit for a tree sales lot during the winter season. Unfortunately, based on Code Enforcement case history, the subject lot is increasingly subject to issues such as the overgrowth of vegetation, accumulation of trash, and storage of inoperable vehicles.

Conversely, across the street lie apartment complexes under the jurisdiction of the City of San Leandro, in addition to church, and retail uses. Notably, the property shares the same owner as 15600 Lorenzo Ave (rear of the subject lot) Moreover, if combined with 15600 Lorenzo Ave, the two sites have the potential to accommodate 59 residential units, offering an opportunity for more comprehensive and cohesive development.

Figure B-29. Recent street imagery of parcel (2024).

The parcel is presently underutilized, with its centerpiece being a liquor store market. Towards the front end of the parcel stands a small office building. Moreover, the rear portion of the parcel exists a 100-foot AT&T easement, with the potential of a beginning of a swale/creek. Access to the parcel is facilitated through two entry points, East Avenue and Windfeldt Road.

In the past, preliminary applications have been submitted proposing a combination of commercial and residential uses, reflecting the varied potential of the site. There have been ongoing discussions between staff and the property owner, who has shown keen interest in developing the lot to accommodate both residential and commercial purposes.

Considering its layout and constraints from the easement and creek, the subject lot can accommodate up to 1 units, with the assumption that 70% of the lot is designated for residential development. If realized, this project would mark a significant milestone within the Fairview Area, as it would be the first of its kind to seamlessly integrate both residential and commercial components.

Considering its layout and constraints from the easement and creek, the subject lot can accommodate up to 17 units, with the assumption that 70% of the lot is designated for residential development. If realized, this project would mark a significant milestone within the Fairview Area, as it would be the first of its kind to seamlessly integrate both residential and commercial components.

# Figure B-30. Recent street imagery of parcel (2024).

The site prompted interest in its development or subdivision over the past few years, due to its consistent vacancy. Previous inquiries have explored the possibility of subdividing the land to create 11 single-family dwellings. The envisioned development for this site would predominantly feature single-family dwellings, catering to the above moderate-income category. This aligns with the prevailing characteristics of the neighborhood, which predominantly comprises single-family homes. The proposal for 15 units on this site reflects 70% of the lot assumed for housing.

The property currently hosts an existing single-family dwelling, which all that exists on this predominately vacant lot. Behind this dwelling lies vacant land, offering ample space for the future development of the site. Access to the property is provided via Bayview Ave. In 2008 the County approved a Tract Map subdivision to divide the lot into 11 new lots, each able to accommodate single family dwellings. Unfortunately, the Tract Map was never filed and the lot has remained predominately vacant since.

On the property exists a single-family dwelling, anchoring the potential for further development on the expansive lot. This sizable parcel of land includes large vacant areas both at the front and rear. With the potential to accommodate more single-family lots, the property presents a promising opportunity for residential development. Prior to the most recent ownership transfer in 2022, there were considerations to subdivide the lot into additional single-family dwelling lots, highlighting the recognition of its development potential. Notably, interior and exterior remodeling projects have been undertaken on the home, contributing to its enhanced value and appeal over recent years.

|                             |                          |

The property contains a single-family house with a large vacant lot to the rear. Access to the rear of the parcel is provided by an existing wide driveway. The area has been subject to subdivisions from existing larger parcels such as this one to smaller single-family residential parcels off a private street. The area for potential developments is approximately one acre in size, but given the slope of the property, development would be limited to the flatter portions of the site.

The property is developed with a single-family house on a large 0.82-acre otherwise vacant parcel that has the petential for subdivision and/or the construction of Accessory Dwelling Units. The underutilized portion of the parcels measures approximately 26,000 sq.ft. in area. The existing house was constructed in the 1950s and has had no renovation improvements since. The land contains dilapidated shed buildings. There is an existing Code Enforcement case for a dilapidated shed at the rear of the property. An adjacent parcel located directly to the north of the subject site recently received approval of a subdivision from one to four parcels. The subject parcel is therefore considered appropriate for higher density development for underutilized portions.

The property, which is vacant except for development of only two small sheds, is a through-lot with access both from D Street and Frum Sunnybank Lane. The property is owned by the same owner of the adjacent parcel to the east, and presents a unique opportunity for residential development with no need for internal private street circulation. The housing development would fill in the gap in residential patterns in this neighborhood, and would increase the housing stock in an area which has recently experienced much development interest from local developers.

The property consists of a single building accompanied by a substantial parking lot, providing potential space for future development. Notably, the parking lot exceeds the required amount, offering flexibility for potential residential uses or expansion.

In recent years, there has been a noticeable increase in mixed-use developments in other communities of unincorporated Alameda County (Castro Valley, San Lorenzo, Ashland/Cherryland). This property stands poised to capitalize on this trend, with its strategic location and versatile infrastructure.

The building has experienced a high turnover rate, with businesses ranging from retail to restaurant uses frequently occupying the space. This corner lot is accessible by a major street, Hesperian Blvd and a smaller street leading to residential uses, Bartlett Ave.

Situated in close proximity to a large park and various other commercial establishments, the property benefits from its prime location within the community. This proximity enhances its appeal and accessibility, furthering its potential for growth and development in the future.

Formatted Table

The vacant land adjacent to both residential and commercial areas presents a unique opportunity for development or repurposing. Despite its current lack of signage indicating its specific use, it appears to be utilized primarily as parking, serving the needs of nearby businesses or residents.

The surrounding uses are predominantly residential, aligning with the same zoning district as the vacant land. This shared zoning designation suggests a harmonious blend of land uses within the vicinity, promoting compatibility and coherence in the built environment. Additionally, the presence of nearby commercial establishments adds vibrancy and convenience to the neighborhood, further enhancing the appeal of the area for potential development or investment opportunities.

Alameda County Housing Element August 2024

Improvement to Land ratio Land: \$ 0

Improvement: \$ 0

Ratio: 0

Income category, # of units Above Moderate income: 57

Figure B-34. Recent street imagery of parcel (2024).

The vacant land that is a portion of a school site owned by the San Lorenzo Unified School District is fenced off from the rest of the school. The school district currently does not utilize it, and has the burden of maintaining the site free of fire-hazards and potential trespassing. The 3.76-acre site is surplus portion of the 9.90-acre school site, Grant Elementary School.

The vacant site is surrounded by a mix of low density and medium density residential development, as well as commercial and community facilities. Access to the site is from a private street owned by a neighboring homeowner's association. The site is a great candidate for increasing density from the current single-family residential zoning to medium density zoning of up to 22 dwelling units per acre, which is a density comparable to surrounding residential uses. The 57 units described for these sites assume that 70% of the entire lot will be occupied by housing.

Sites Inventory and Methodology

Formatted Table

In summer 2024, Building Opportunities for Self-Sufficiency (BOSS, formerly Berkeley Oakland Supportive Services) approached the County with the request to help enable additional affordable housing at 730 Bartlett Avenue. At the time of writing, there are 10 affordable units at the property, known as Pacheco Court, serving adults and households who have experienced homelessness. BOSS has proposed replacing the existing 10 units with 30 total units at the same level of affordability. The existing housing was constructed in 1965; new housing would allow for more modern updates as well as 20 additional affordable units in a neighborhood that experiences overcrowding.

To support the additional affordable housing, proposed rezonings will allow up to 86 units per acre, accommodating the 30-unit project BOSS wishes to complete.

This site consists of five parcels at the corner of Mission Boulevard and Hampton/Mattox Road in the Ashland neighborhood. These sites were previously under contract to become a commercial and community space with 56 market-rate rental units. That project was unable to proceed, and the parcels continue to stay in the ownership of the County as legacy sites from the former Redevelopment Agency. Two bus lines pass by this site, and it is .5 miles from entrances for highways 580 and 238. A community garden, a new park, and other sites inventory sites are located nearby. The site is rated Low Resource in the 2023 HCD/TCAC Opportunity Map. These parcels are among those proposed for rezoning to a higher density of units. Staff anticipate that this, coupled with the requirement to allow 100% residential housing in mixed-use zones, will allow for a financially viable project.

### B.2.10B.2.8 Programs Incentivizing Housing Construction

To incentivize housing construction over the planning period and beyond, the Community Development Agency of Alameda County currently offers or will implement the following programs and policies:

- · Incentives for development:
  - o Program 1.M: Senate Bill 9 Compliance
  - o Program 2.A: Density Bonus
  - o Program 2.B Small Lot Consolidation
  - o Program 3.H: Housing Element Overlay Combining
  - o Program 4.H: Housing Opportunities for Persons with Disabilities
- Fast-tracking Permits:
  - o Program 1.F: Online Permitting and Streamlining
  - o Program 3.A: Streamline Parking Requirements
  - o Program 3.B: Planning Commission Streamlining Subcommittee
  - o Program 3.D: SB 35 Processing and Permit Streamlining
  - o Program 3.H: Housing Element Overlay Combining District
  - Program 7.B: Environmental Review Streamlining
- Assembling parcels:
  - o Program 1.A: Rezone Sites to Meet RHNA
  - o Program 1.B: San Lorenzo Village Specific Plan Priority Development Area Grant
  - o Program 1.G: Lower-Income Sites Modifications to Address Shortfall
  - o Program 2.B: Small Lot Consolidation
- Rezoning Programs:
  - o Program 1.A: Rezone Sites to Meet RHNA
  - o Program 1.C: Facilitate Housing at Bay Fair BART Site
  - o Program 1.D: Facilitating Sheriff's Radio Facility Development
  - o Program 1.H: General Plan Consistency
  - o Program 1.I: Monitor and Facilitate Pipeline Housing Projects
  - o Program 1.J: Rezone 5th Cycle Lower-Income Housing Sites
  - o Program 1.L: Update Castro Valley Business District Specific Plan
  - o Program 1.O: Preparation of Castro Valley BART Station for future Development

These programs are discussed further in the main body of the element. As described throughout this section, nonvacant sites proposed for residential uses are generally underutilized, and the county has a variety of programs to encourage their development as housing. Based on local market trends and recent examples of similar uses redeveloping as housing in neighboring jurisdictions, nonvacant uses are likely to discontinue during the planning period and help meet RHNA.

# Section B.3 Adequacy of Residential Sites in Meeting RHNA

## B.3.1 Summary

The following table summarizes the County's methods for satisfying its RHNA (Table B-5851). Based on ADU projections, entitled projects, and available sites, the County has a shortfall in all income categories. However, given the County's rezoning of the parcels in table B-60-53 in accordance with Program 1.A: Rezone Sites to Meet RHNA, the County has a surplus in all income categories as shown in table B-5952.

Table B-1451: Residential Development Potential and RHNA
